

I am

a person with
symptoms similar to
Parkinson's Disease.

I'm trying to

But

I have to visit a doctor
or online source is
difficult to use.

Because

To go to doctor I am not
confident or sure if symptoms
are real and online source to
diagnosis are not reliable and
not user friendly.

Which makes me feel

unecouraging to go for
a diagnosis and result
into severe cases of
Parkinson's Disease.
